The General says the party had no intimation of danger until the Courier, who had been sent out to warn them, rode into camp.

At that time they were between the Little Platte and Laramie Rivers, about twenty-five miles northeast of North Park. Sunday of last week they were only fifteen miles northeast of Milk River, and the next day left for Little Platte, fifty miles from the scene of Thornburgh's engagement. At that time they had no knowledge of their danger, although there were stories among the settlers in North Park to effect

that straggling band of Utes had been met with going South.

The party had intended to stay several days longer, but, owing to the excitement and the anxiety of their families, decided to return, although they did not consider themselves in any personal danger. Mrs. Tyner joined the party at Cheyenne, and left for the East last night. The General leaves this evening.

## Verdi's Requiem.

Every one who buys the score of Verdi's Requiem reads on the back, "Requiem composed for Manzoni," but one must have read "Il Canto Magico," and "I Promessi Sposi," to realize what the name of Manzoni means, to the heart of one of his countrymen.

Grandson of Beccaria, he inherited his talent and was unfortunately in early life tainted with the Voltairism of his grandfather. Later the necessities of an ardent and religious love, together with the influence of a good wife, brought him back to a more consoling philosophy and his most beautiful poetic effusions were the result of this happy change.

On the death of Napoleon I he wrote his "5th of May, 1821," in which religion claimed the great Emperor as her own. "Never," said Manzoni, (in this certainly the most beautiful ode of our century) "Never did a more sublime intelligence humble itself before the opprobrium of Golgotha." But the reputation of many one rests, after all, more upon his story of the betrothed (I Promessi Sposi). This touching idyll has been translated into every language.

A simple village love story serves as a pretext to give a very complete picture of Italian Society in the XVII century. His description of the plague in Milan, his picture of Federico Borromeo, who can ever forget them? Manzoni lived to near 90, and his death was felt in every town and hamlet in Italy, as a personal loss.

"Verdi's Requiem" seems to be inspired by friendship, and to partake of the pure and beautiful genius of Manzoni. And we are to hear this mass sung by fine artists in a Catholic Church? Yes, we are to have this musical treat, and everything promises that not only the intrinsic merits of the grand music, but each surrounding will contribute to make it one of the most perfect oratorios ever heard in our music-loving town.
